

# MEDICAL EQUIPMENT CHANGE-OUTS

---

Tampa, Florida

---

LDCi has worked with several health care organizations to change out MRI, Linear Accelerators, X-Ray radiation therapy, PET and CT medical equipment. Medical equipment change-outs are highly complex and require the architect to work closely with the equipment vendor. In addition, LDCi works with the Agency for Health Care Administration (AHCA) to ensure the spaces abide by all code regulations for safety.

LDCi has provided medical equipment change-out services for Sarasota Memorial Hospital, H. Lee Moffitt Cancer Center & Research Institute and BayCare (St. Joseph's Hospital - Main, Morton Plan Hospital, St. Joseph's - North).
