

# OPERATING ROOM RENOVATIONS

---

Tampa, Florida

---

LDCi has worked with several health care organizations to renovate operating rooms and incorporate new technology, surgical and equipment vendor systems. Operating space is highly regulated because of the equipment involved and direct patient contact. To ensure the space follows all safety regulations, LDCi works with the Agency for Health Care Administration (AHCA). The various design teams, led by Ryan Murphy and Antonio Amadeo, provide principal attention to deliver projects within budget and on schedule.

LDCi has worked closely with SSR, Inc. and JLRD Consulting Engineers, Rañon General Contractor and DeAngelis Diamond on these complex projects.
